

## Technical advantages and USPs Auterion Acecore Zoe

- **All weather** capable in the real world.
- **Heavy lifter**- Zoe has a 5kg useful load capacity
- **Versatility**- same drone works with an integrated A7r IV or Phase One payload.
- **Extended product lifetime**- at least 4 years w/ minimal maintenance.
- **Local service and maintenance**- working together with the US-based Robotic Skies, users always have a service center near them – minimizing down time whatever happens.
- **Customer support**- Acecore offers responsive after sales support and maintenance services.
- **Free training**- at delivery of the system.
- **On-site training**- available.
- **Octocopter**- Can be configured as an octocopter for added motor redundancy.
- **Customization**- Users can customize their Zoe with custom integrated systems, modules, payloads and cosmetics.
- **Build quality**- Handmade in The Netherlands, using highest quality materials available.
- **Backwards compatible upgrades**- Acecore offers many backwards compatible upgrades after purchase to comply with fast-paced industry developments.
